

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method for maintaining a data structure corresponding to an object having a first link from a first directory and a second link from a second directory in a filesystem, the object to which the data structure corresponds being selected from the group consisting of a file and a directory in the filesystem, the first and second directories being parent directories to the object to which the data structure corresponds, the method comprising the steps of:

storing in the data structure a first anchor point for the object that references the first directory, said first directory implemented on a first filesystem type; and

storing in the data structure a second anchor point for the object that references the second directory[[:]], said second directory implemented on a second filesystem type different than the first.

2. (Original) The method of claim 1, wherein the object is a file.

3. (Original) The method of claim 1, wherein the object is a directory.

4. (Previously Presented) The method of claim 3, wherein the directory is of the first filesystem type.

5. (Original) The method of claim 4, wherein the first link from the first directory to the object is a directory link; and the second link from the second directory to the object is a file link.

6. (Original) The method of claim 1, further comprising the steps of:
receiving a request for information about the first link; and
in response to the request, using the first anchor point when retrieving the information.

7. (Original) The method of claim 1, further comprising the steps of:
receiving a request for information about the object;
selecting the first anchor point instead of the second anchor point to respond to the request.

8-27. (Canceled).

28. (Previously Presented) The method of claim 1, wherein the second filesystem type is a newer version of the first filesystem type.

29. (Previously Presented) The method of claim 28, wherein the second filesystem type is NTFS, and the first filesystem type is FAT32.

30. (Previously Presented) The method of claim 1, wherein the first and second filesystem types are associated with different operating systems.

31. (Previously Presented) The method of claim 30, wherein the first filesystem type is associated with an HP-UX operating system, and the second filesystem type is associated with a Windows operating system.
